## **Checklist for TFE permitting**

Food Handling
Foods from an approved source.
Raw meat, poultry, and fish must be purchased in ready to cook portions unless providing sufficient equipment and
prep areas. Subject to approval.
No bare hand contact with ready to eat foods. (Provide gloves as needed.)
Date marking system for ready to eat foods held more than 24 hours.
No cooking and cooling of foods for subsequent days use unless approved at permitting.
No food preparation prior to the event or issuance of permit
Non-mechanical coolers must have a drainage port.
Potentially hazardous foods from previous events not used if removed from original packaging.
Employees are required to wear effective hair restraints, clean outer clothing, and have good hygiene; no tobacco use.
Employee health policy.
Food Protection
Foods must be secured to protect from tampering and contamination.
A food prep sink available if washing produce.
Food shields or barriers are required to protect food and food contact surfaces from contamination.
Overhead protection is required to protect all food, utensils, and equipment with the exception of cookers with attached
lids being used to cook bulk foods such as roast, shoulder, and briskets. When cooking individual servings, overhead
cover is required. Currently, this includes grilled corn in the shuck as well.
Public access limited to dining areas only. Storage beside units must be blocked from public access.
Toxic materials labeled and stored to prevent contamination of food and equipment.
Physical Requirements
Hot water heating facilities provided.
Three basins for washing, rinsing and sanitizing provided with adequate space for air-drying or three compartment
sink provided if using multiuse utensils.
Wash, rinse, and sanitize solutions maintained as specified in food code. Test strips provided.
Indoor/outdoor carpeting, matting, tarps, or similar non-absorbent material is required as ground covering in the
absence of asphalt, concrete or grass.
Handwashing facilities must be at least a 2-gallon minimum container with unassisted free-flowing faucet, wastewater
receptacle, warm water, soap and single use towels.
All potable water holding tanks, containers and hoses shall be drained, washed, rinsed and sanitized and must be
labeled for their purpose as well as protected from contamination.
Wastewater collection containers must be as large as the potable water tanks. If connected to a municipal hose bibb,
connection to municipal sewer required.
Lights must be shielded or shatterproof if provided and lights are required for nighttime operations.
Premises clean and garbage handled in a sanitary manner
Fly, and rodent control provided
Toilet facilities conveniently located for employees
All required equipment based on menu is in place Thermometers provided.
Recommended single service condiment packages no bulk condiment dispensing from hand pumps

Specialist may condition permit to ensure compliance with rules .2665 through .2669
